Subject Paint Works Seep Area Report

History:

This message has been replied to.

bonnie -

how are you these days? good i hope - and i am sure you are keeping busy without having to deal with my site!!

just wanted to let you know that we are in the final stages of completing a supplemental RI work plan for the Paint Works for your remedial group (which i am sure you are aware), and in conjunction with this, we have compiled all the previous paint works data into one comprehensive report.

based on our last discussions - i am under the impression that you would prefer NOT to receive such a comprehensive document, but rather, a more streamlined version that only contains the data which we collected under the Expedite Notice you issued - so that you can finally close out this portion of your file. if this is correct, we will be preparing within the next week or so - a simplified version of the comprehensive report - with just the seep area data we conducted for removal, and we will forward that to you by the end of the month.

if, however, i am mistaken and you would like a copy of the 4 volume report we are submitting to the remedial folks - just say the word and you too can have your very own copy.

i know that we also owe you a kirkwood lake report - which again, we intend to submit in a more streamlined version, per your earlier request. i hope to get this to you within the next several weeks as well (too many reports and deliverables due all at once and i think i am burning out my consultants - need to give them a little breather!).

so - just let me know if my assumptions are correct and we will go from there!!

have a happy mother's day also !

mlou
